

FKM engine shaft seals

Rotating shaft seals offering optimum performance for automotive applications.

SKF offers a wide range of FKM engine shaft seals. Our extensive testing capabilities allow us to provide the most superior and reliable product on the market.

Available applications

Crankshaft, camshaft and auxiliary units.

Thanks to our extensive manufacturing experience we offer rotary seals with the following features:

- High pump helix for high sealing security
- Efficient dirt exclusion
- A range of outer diameter designs for best installation and retention of the seal
- Custom-blended materials

SKF engine shaft seals add value by delivering the following advantages:

- Improved reliability
- Help overcome shaft deficiencies
- Extended service life
- Ease of installation and retention
- Excellent fluid resistance and high temperature ranges
- Wide selection of dust lips to minimize ingress contamination
- SKF has a proven success record in the production of FKM shaft seals worldwide, supplying to the major engine manufacturers
