

Lincoln industrial pumping equipment

LINCOLN

People, capabilities and systems to save money and increase productivity

Industry leader

Continually satisfying our customers with the world's best lubrication equipment and pumping systems has made Lincoln the largest and most successful company in our field. For over a century, companies have relied on our technical and quality leadership; our world-class manufacturing and customer service, and our vast network of distributors and support facilities.

Research and development

In order to provide the best worldwide and regional application solutions, Lincoln develops new products and systems at research and development facilities in the United States, Germany and India.

Providing solutions

Industrial customers in large processing plants, automotive manufacturing, pulp and paper mills, food and beverage and other manufacturing facilities can depend on solutions from Lincoln. For the toughest mobile applications, on the road or in the field, Lincoln protects heavy equipment used in mining, construction, agriculture and over-the-road trucking. In addition, Lincoln offers the best lubrication equipment to meet the needs of automotive service professionals.

Complete product line

Lincoln supplies automated lubrication systems, pumps and pump stations and top quality lubrication equipment and accessories. Our quality systems in the United States and Germany are ISO 9001 registered and our fittings business is QS 9000 registered.

Worldwide support

With five technical support centers on three continents, and a network of distributors supported by regional sales and service offices, our customers can always draw on our worldwide resources.

Industrial Pumping Equipment

Introduction

Lincoln provides the technologically advanced pumps required for today's demanding applications because we can draw on more than 60 years experience with industrial pumping systems.

Our pumps excel in applications that range from the transfer of lighter fluids (oils, solvents, adhesives, etc.) to the movement of medium-viscosity materials (RTV silicone, greases, coatings, plastisols, offset inks, etc.) to the tough job of pumping very heavy-viscosity materials (ink flushes, epoxies, mastics, etc.).

Our systems are found in diverse industries, including printing and publishing, automotive manufacturing, rotational molding and other demanding industries that require time-proven systems for application of their materials in manufacturing.

PowerMaster® III Pumps

Building upon our success with standard drum pumps, we have taken their design into the 21st century with completely pneumatic, modular air motors and six-inch stroke pumps for greater material output. Accessories include an AirBrake™ option for prevention of pump runaway due to an empty container, a broken supply line or other loss of pump prime. A variety of packing materials ensures correct packing based on material compatibility.

PileDriver® III Pumps

For high-volume applications of viscous materials from standard drums or bulk tanks, these industry-standard pumps incorporate the same completely pneumatic, modular air motors. Along with the AirBrake option and a wide variety of packing materials, PileDriver III pumps feature a patented leakless gland design that protects the pump from gland seal failure and subsequent downtime for replacement.

We have a wide range of system accessories, from pressure primers and other mounting accessories to material control valves, ejectors, measuring valves, air controls and system hardware.

Selection of system accessories is based on general system type and your particular system's needs. Our network of systems house distributors is ready to help design the industrial pumping system that is right for you. Contact the Lincoln Technical Service Department (314-679-4200, ext. 4782) for the name of your nearest systems house distributor.

Transfer System

Material is transferred from its original container to another point. Typically, the simple transfer of low-viscosity fluids through relatively short supply lines requires low pressure, high-volume pumps. If higher viscosity fluids are involved, or longer supply lines are required, a pump capable of higher pressures becomes necessary. Transfer systems transfer:

- Printing inks to press fountains.
- Adhesives to reservoirs on packaging machinery.
- Lubricants to smaller containers in remote locations.
- Materials to high-pressure pumps for spray or flow applications.

Measure System

Material is pumped from original containers through the supply lines to measuring valves or ejectors, which in turn meter precise amounts of material to a work piece. Typical measure systems include:

- Multiple shots in patterns of adhesives used to bond substrates, such as automobile hoods and doors.
- Measured lubricant applied to electric motors in appliance manufacturing.
- Single-shot applications of adhesives or sealants used in manufacturing.
- Cartridge filling lines.

Flow System

Material is pumped from the original container through the supply line to a flow gun which applies the material to a work piece. Typical flow systems include:

- Adhesives applied to substrates for bonding in construction and other industries.
- Adhesives used in the manufacture of modular or mobile homes.
- Sealants applied during manufacturing to various parts of vehicles, including sun shields, tail lights, weld lines and hem flanges.
- Recommended for use where normal pump operation does not exceed 45 cycles per minute.

Features

- State-of-the-art, fully pneumatic air motors, 3, 4, 6, 8 inches (76, 101, 152, 203 mm) diameter.
- Full six-inch stroke for greater output per cycle.
- Modular design for easy repair.
- Only five moving parts, no metal-to-metal contact.
- Newly designed pump tubes offer ratios and outputs to fit any application.
- Available to fit any drum or pail size.
- Offered in carbon steel, stainless steel or hard-chrome plated.
- Complete selection of packing materials available.
- Full line of priming equipment and mounting devices.
- Ball-style for fluid materials. Shovel foot-style for high-viscosity, non-fluid materials.

Series III Air Motors

- Full pneumatic operation for longer life and durability—only five moving parts.
- Total modular design for ease of service and maintenance.
- Quiet operation—meets or exceeds OSHA requirements at all recommended operation air pressures.
- Interchangeable with all PowerMaster® III pump tubes.
- Acceptability of pump monitors and controls.

AirBrake™

- Shuts down pump immediately when excessive pump cycle speed (runaway) occurs.
- Prevents pump damage due to a runaway condition.
- Indicates system fault caused by empty container or broken supply line.
- Limits spills due to pump outlet hose failure.
- Sends fault signal to remote alarm locations with optional 244398 signal kit.
- Tamper-proof knob (part number 273835)
- Can be ordered already installed (refer to Pump Specification Chart).
- Can be added later. Order model 85317.
- Easy to install and set—graduated dial with detents.
- Kit 273429 upgrades existing AirBrake-equipped pumps to the latest specifications
- Recommended for use where normal pump operation does not exceed 45 cycles per minute.

See Pump Selection Chart in this section.

Model 84985

Pump Tubes—Ball Foot Design

- For light- to medium-viscosity, fluid materials.
- Available in three styles: stub length for bulk mounting, 55-gallon or 16-gallon drum size.
- Complete packing selection for total chemical compatibility.
- Ratios from 6:1–42:1, outputs to 3.9 gpm (14.6 lit/min.).
- Complete interchangeability with all Series III air motors.
- Exclusive, patented, “leakless” gland assembly kit is available as an accessory.

Model 84991

Pump Tubes—Shovel Foot Design, Plunger and Bushing Style

- For medium- to high-viscosity, non-fluid materials.
- Available in 55-gallon or 16-gallon drum lengths, or mounts on pressure primer for very high-viscosity materials.
- Full range of ratios: 12:1 through 84:1 for all applications.
- Selected fit, hardened steel plunger and bushing is particularly well suited to viscous lubricants.
- No washers, o-rings or packings to replace on pump piston for ease of maintenance.
- Shovel foot adds mechanical priming to normal suction, assures positive prime with the most viscous of lubricants.
- Complete interchangeability with all Series III air motors.
- Exclusive patented, leakless gland assembly kit (to protect gland seal—the only seal in pump tube) is available as an accessory.

Model 84976

Pump Tubes—Shovel Foot Design, Packed Piston-Style

- Furnished with exclusive, patented, leakless gland assembly.
- For medium- to high-viscosity, non-fluid materials.
- Available in 55-gallon or 16-gallon drum lengths; also suitable for mounting on priming equipment or standpipe mounting for bulk delivery.
- Full range of packing materials available for product compatibility.
- Complete interchangeability with all Series III air motors.
- Full range of ratios: 10:1 through 80:1.
- Specifically designed to enhance growing market for dispensing industrial-type materials: sealants, adhesives, urethanes, inks, etc.

See Pump Selection Chart in this section.

Patented* Leakless Gland Assembly

The gland seal of all reciprocating positive displacement pumps is its weakest point and is the single most common cause of pump failure, lost downtime and maintenance expense. Lincoln's new gland design uniquely addresses the causes for premature gland seal failure.

A special protective bushing (or sleeve) with concentric grooves creates a labyrinth path to reduce the internal operational pressure as well as the pressure fluctuations developed during pump stroke changeover.

Leakless gland assembly is standard with packed piston pumps and is available for all PowerMaster III pumps as an accessory.

* U.S. Patent No. 4,976,192

Gland Protection Sleeves

Model 86214

Order Model	For Pump Tubes
86214	All Ball Foot Design Pump Tubes
86215	84997 & 84998
86216	84993 & 84994
86217	84995 & 84996
86218	84991 & 84992

Model 86213 Lube Cup Kit

For all PowerMaster® III pump tubes. Used in conjunction with the gland protection sleeve to prolong service life of gland packing. Prevents material from drying out on plunger.

Model 86213

Packing Kits for PowerMaster® III Pump Tubes

Lincoln offers alternate packing kits of PTFE for some PowerMaster III pump tubes because many materials used in today's manufacturing environment may not be compatible with the standard seals. Please consult Lincoln for compatibility of the material to be dispensed with standard packings or alternate packing kits.

Model 84502

Pump Tube	PTFE Kit
84982 84984 84985 84986 84987	84502

Model 86268 3" Male Camlock Adapter for PowerMaster® III Pump Tubes

Adapts Lincoln PowerMaster pump tubes to tanks and totes equipped with 3" female mil spec camlock outlet.

Model 86268

Model 84945

Model 16177

Model 84377

Model 83727

Drum Covers

Model 81412

Standard 55-gallon drum cover for mounting PowerMaster III series drum pumps on full, open drums.

Model 83166

Special 55-gallon drum cover for mounting PowerMaster III series drum pumps on full, open drums. Includes port for installation of material agitator.

Model 81538

Standard 16-gallon drum cover for mounting PowerMaster III series drum pumps on full, open drums.

Follower Plates

Model 83369

For 400-pound drums.

Model 84780

For 120-pound drums.

Model 83132 Bung Bushing

This 55-gallon drum bung bushing screws into the bung opening of the drum to secure any Lincoln PowerMaster III pump.

Model 84963 Flange Mounting Assembly

Used for rigid mounting of PowerMaster III pumps to the top of fabricated bulk tanks.

Model 84826 Wall Mount Bracket Kit

For PowerMaster III air motor assemblies.

Model 84945 Suction Kit

Used with PowerMaster III stub pumps for convenient transfer of petroleum products from drums, bulk tanks or reservoirs. Includes bung bushing suction tube, hose and coupling assembly and other hardware.

2"x1" bell reducer required—not included.

Model 16177 Foot Valve Adapter

Converts inlet of models 84984 and 84985 Ball-Type PowerMaster III pumps to 1½" NPTF female thread for attaching extension pipe.

Drum Dollies

Model 84377

55-gallon (400 lbs) band-type drum dolly with four swivel casters and screw clamps.

Model 84192

16-gallon (120 lbs) band-type drum dolly with four swivel casters and screw clamps.

Model 83727 Standpipe/Model 83732 Adapter Kit

Use of model 83732 adapter & bracket kit will enable PowerMaster III pumps to be assembled to model 83727 stand pipe for pumping from bulk tanks. Inlet 3" NPT female.

Elevator, Primer and Pressure Primers

Lincoln's mounting accessories include an elevator (Model 1709) to facilitate drum change-over by lifting the pump from an empty drum and lowering it into a new drum with minimum effort. Primers and pressure primers are available for positive priming of viscous materials which are forced into the pump inlet by the downward force of the follower. Models are available for most applications from 5-gallon pails to 55-gallon drums. Models include followers with O-ring seals single O-rings for 5-gallon pail units and double O-rings for 55-gallon drum units) which seal the container of material from outside contamination and drying while wiping the container's sides clean.

Pressure primers include a four-way valve which permits the air supply to be coupled to the unit at all times. Use of an air regulator and gauge is recommended. In order to prevent damage to pumps caused by operating after a drum is empty, a low-level air cut-off assembly is recommended.

Model 1709

Model 2716

Model 1701

Notes:

**Model 83943 portability kit is available for Model 1701. Includes axle and wheels.

For pressure primers for 120 lb. drum pumps or for follower rings of materials other than standard Buna-N, contact Lincoln Technical Services.

Note:

Pumps not included with pressure primers.

Model 1736

Low-Level Air Cut-Off Assembly **Model 83811**

For use with Model 1704 pressure primer. Mounts directly to elevator support. Automatically shuts off air flow to pump when drum of material is emptied. Eliminates unnecessary parts wear caused by continuous pump action when drum is empty. Inlet $\frac{3}{4}$ " N.P.T.(F).

Model 83970

Same as Model 83811, except for use with Model 2716.

Model 84143

Same as Model 83811 except for use with Model 1736.

Model 84167

Chimeless Drum Kits

Because some materials are supplied in straight-sided or chimeless drums, Lincoln has developed hold-down kits which facilitate follower and pump extraction from these drums. Kits are available as follows:

Kit No.	For model PowerMaster® III
84167	1704
84503	1736

Model 85387-8
 Included in 84144 Kit

Airline Kits for Primer and Pressure Primers **Model 84144**

Includes filter-lubricator-regulator, bracket and fittings to adapt air accessories to Models 2716, 1736 and 1704. Includes $\frac{1}{2}$ " controls.

Model 84141

Same as Model 84144, except includes $\frac{3}{4}$ " controls.

Model 84722

Model 84722 Series III Air Motor Exhaust Adapter

Replaces standard muffler. Converts exhaust port to $\frac{3}{4}$ " NPT female thread.

Model 66764 Muffler with $\frac{3}{4}$ " NPT Male Thread

Fits on Model 84722.

Model 84723

Model 84723 Series III Air Motor Cover Panel Kit

Metal cover fits over tie rods. Encloses moving plunger rod.

Series III Air Motor Features

- These fully pneumatic air motors reverse stroke direction without mechanical linkages and are simpler and more reliable than older designs.
- Air motors are 3, 4, 6, 8 and 10 inches (76, 101, 152, 203 and 254 mm) diameter.
- An air signal valve activates a relay valve at the end of each stroke.
- The shifting relay valve changes the power valve position.
- The power valve shifts air flow to the opposite side of the power piston to reverse stroke direction.
- Modular Construction: Air motors are easy to install, maintain and upgrade with options like AirBrake™.
- Built-in Muffler: Meets or exceeds OSHA requirements at recommended air pressures.
- AirBrake Options: Stops runaway pump, prevents product spills, damage and excess wear and activates an optional remote alarm device. AirBrake available already installed (refer to pump specification charts) or can be ordered separately as Model 85317. For remote monitoring of AirBrake, order Model 244398 signal kit.

*Model 84921

Model 84904

PileDriver Series III Pump Tube Features

- Machined inlet casting: Set screws secure the inlet assembly and permit 360° outlet adjustment to facilitate system plumbing and provide for easy pump removal/replacement.
- Cartridge-type gland with scrapers and patented protection bushing: Extends the life of gland packings by protecting them from excessive material build up and pressure fluctuations. Cartridge removes easily for routine service.
- Straight-through pump tube and piston-port design: Reduces internal friction and the opportunity for solids entrapment.
- Load-bearing, chrome-plated internal pump tube surface: Distributes forces between gland and pump tube to prolong seal life.
- Choice of inlets: Shovel-type for thick material or flat check for higher flow rates.

* Air motor available separately.

Model 1765

Pressure Primer Features

- Positive priming force on the material.
Downward force of the follower forces material into the pump inlet.
This assures positive priming of high-viscosity materials.
- Follower has an Elastomer seal.
Wipers, single o-rings or double o-rings seal against the material container's sides. This prevents drying and contamination of the material and wipes the container's sides clean.
- Four-way air valve control.
This directional valve controls up/down movement of the follower.
Primer unit remains coupled to the air system at all times. (Use of an air regulator and gauge is recommended).
- Primers available for a wide range of material container sizes.
Lincoln has primers for 5- and 55-gallon material containers.
You can match the primer to the container size required for your application.

Model	For U.S. Drum Size gal	Description	Operating Air Pressure psi / bar	Priming Pressure psi / bar

Model 84167

Chimeless Drum Kits

Because some materials are supplied in straight-sided or chimeless drums, Lincoln has developed hold-down kits which facilitate follower and pump extraction from these drums. Kits are available as follows:

Kit No.	For model PowerMaster® III
84167	1704
84503	1736

Model 84722

Model 84722 Series III Air Motor Exhaust Adapter

Replaces standard muffler. Converts exhaust port to 3/4" NPT female thread.

Model 84723

Model 84723 Series III Air Motor Cover Panel Kit

Metal cover fits over tie rods. Encloses moving plunger rod.

Low-Level Air Cutoff Kits

Shuts air off when drum is empty. Prevents pump damage and introduction of air into supply line. 3/4" NPT female connections.

Included in 84144 Kit

Model 85300

Hydraulic Motor for PowerMaster® III and PileDriver® III Pump Tubes

- Safe to use where electric or pneumatic motors may be hazardous.
- Virtually eliminates concerns about air supply condition and exhaust emissions
- Efficiently generates high material pressure and flow rate with minimum hydraulic power consumption.
- Few internal moving parts. No mechanical linkages or solenoids to fail or wear out.
- A completely internal changeover circuit requires no external signal for reciprocating action.
- A balanced cylinder design eliminates the need for separate up and down stroke adjustments.
- All key components are machined from steel or aluminum to ensure long service life in the toughest applications.
- Hydro-PowerMaster was designed and is manufactured under the strict conditions of an ISO 9001 registered quality system.

Model 86300

Model 86400

Hydraulic PowerMaster® Motor

Rugged design with minimum moving parts, maximum reliability and durability in heavy-duty applications

- Two motor sizes available
- Expands pumping capability to higher pressure and/or higher volume applications
- Internal logic provides smooth changeover for each stroke
- No need for external pressure or limit switches and solenoid valves
- Responds immediately to changes in grease volume/pressure demands
- Versatile – designed to deliver effectively in transfer and automated lubrication
- Use with Lincoln's PowerMaster and PileDriver pump tube

Material Shut-Off Valves

Lincoln recommends the use of material shut-off valves between the supply pump and the material supply line pipe. This enables you to disconnect the pump for service without voiding the supply line of material. Shut-off valves also can be used at the material outlets of the drop lines to control the flow of material in transfer systems.

Model 884

Needle-Type Valves

Model	Inlet & Outlet	Max. Working Pressure - psi / bar
884	3/8" NPT Female	10000 / 690

Model 775

Low-Pressure Control Valves

Ideal for controlling flow of materials in transfer systems.

Model 780

Model	Max. Inlet Pressure psi / bar	Inlet Size	Outlet Size	Extension	Features / Benefits
82906	1000 / 68	1/2" NPTF	1/2" NPTF	Optional	High flow rate means fast transfer of low- to medium-viscosity fluids
775				Rigid Pipe	
776				Flex Hose	
780				Rigid Pipe	Swivel extension aids access to hard-to-reach areas

High-Pressure Control Valves

Ideal for controlling flow of materials in higher-pressure transfer systems and extrusion systems.

Model 85905

Model 83586

Model	Max. Inlet Pressure psi / bar	Inlet Size	Outlet Size	Extension	Features / Benefits	Options/Kits Accessories
85905	5000 / 345	1/2" NPTF	1/2" NPTF	Optional	Trigger latch reduces operator fatigue during continuous use.	91935 carbonyl seat for abrasive materials.
83586		1/4" NPTF	1/8" NPTF	2" rigid with 3/32" orifice	Slim, lightweight design w/ adjustable trigger spring for precise, easy operation. "The Palm Gun" has Tungsten Carbide needle and seat.	
83587			Fixed		Same as 83586 except has hardened steel needle and seat located intip for drip control.	
81495	10,000 / 680	3/8" NPTF	1/8" NPTF	Optional	Heavy-duty machined steel construction for high-viscosity, high pressure, extreme service applications.	66001 Ball seat for high-volume flow. Max. pressure limited to 2000 psi/138 bar. Ball & Seat for abrasive material applications.

Model 68874

Model	Length in. / mm
62028	6 / 150
62061	12 / 300
62117	18 / 450

Model 81728

Model 82072

Swivels

Designed for use between the material hose and control valve to give the operator more flexibility and mobility and to reduce fatigue.

Model	Style	Threads	Max. Working Pressure - psi / bar
81728	Straight	½" NPT Male x ¾" NPT Male	6400 / 435
82072	Straight	½" NPT Male x ½" NPT Male	
82087	90°	½" NPT Male x ½" NPT Male	
81729	Universal	½" NPT Male x ¾" NPT Male	
82073	Universal	½" NPT Male x ½" NPT Male	

Important Note: For lubricant use only. Not recommended for abrasive or corrosive materials.

Material Pressure Gauges

Model 66689

Model 66111

Model	Pressure Range	Connection	Remarks
66689	0-2000 psi 0-140 kg/cm ²	¼" NPT Male Bottom	2½"/65mm dial, black steel case & ring, bronze bushed movement & front recalibration with stabilizer in shank.
68946	0-2000 psi 0-140 kg/cm ²	¼" NPT Male Bottom	Same as 66689 except dual needles. Red needle indicates maximum pressure recorded. Black needle indicates actual pressure being developed.
69827	0-3000 psi 0-210 kg/cm ²	¼" NPT Male Back	2½"/65mm dial, black steel case, glass filled. Nylon movement.
69844	0-3000 psi 0-210 kg/cm ²	¼" NPT Male Bottom	Same as 69827 except bronze bushed movement.

Model	Pressure Range	Connection	Remarks
66111	0-5000 psi 0-350 kg/cm ²	¼" NPT Male Bottom	3½"/75mm dial, glass filled nylon movement.
69910	0-6000 psi 0-420 kg/cm ²	¼" NPT Male Back	2½"/65mm dial, black steel case and plain movement.
69039	0-5000 psi 0-350 kg/cm ²	¼" NPT Male Bottom	2½"/65mm dial, black steel case & plain movement with dual needles. Red needle indicates maximum pressure recorded, black needle indicates actual pressure being developed.

Important Note: For lubricant use only. Not recommended for abrasive or corrosive materials.

Industrial Pumping Equipment

Air-Operated Ejectors

Model 83664

Model 85250

Model 84564

Model 84540

Designed to be combined with PowerMaster® or PileDriver® pumping systems to dispense measured shots of mastics, epoxies, sealants, greases and other viscous materials. The ejectors are true positive-displacement measuring devices which accurately dispense material onto the work piece.

- Positive-displacement measuring/dispensing
- Steel plunger & body assembly
- Adjustable plunger stop
- High air/material ratio
- Maintain extreme accuracy and repeatability, even where temperature, viscosity and material/air supply pressure are variable. (Repeatability suffers with competitive timed metering systems as the variables change.)
- Displacement volume can be adjusted
- High-viscosity capability
- High-speed capability

Model	Ratio	Operating Air Pressure	Max. Priming Pressure	Output Per Cycle	Dimensions		Air Inlet NPT Female	Mat'l Inlet NPT Female	Mat'l Outlet Female
					A	B			
83664	27:1	80-100 psi / 5.5-7 bar	1,000 psi / 68 bar	.005-.045in ³ .08-.74cc	11¼" 286mm	4" 102mm			⅛"

85252	35:1		1,500 psi / 102 bar	.015-.200in ³ .25—3.3cc	13¾" 337mm	3⅞" 98mm			
84564	36:1		2,000 psi / 138 bar	.1-1.0in ³ 1.6-16cc	20⅞" 522mm	5¼" 133mm	⅜"	⅜"	⅜"
84540	35:1			.5-2.5in ³ 8-41cc	21" 536mm	8⅞" 213mm	½"	½"	½"

Note: Order model 85250 when dispensing compatible materials; order model 85252 when dispensing petroleum-based materials.

Designed to be combined with PowerMaster® or PileDriver® pumping systems to dispense accurate volumes of adhesives, sealants, plastisols, lubricants and other medium- to high-viscosity fluids. These positive displacements valves address the following applications:

- Product packaging (pump material from 400 lb. drum to fill 16 oz. paper cartridges)
- Process fill (vinyl plastisol into product molds)
- Product fill (measure fluid into gear boxes, drives)

All Lincoln Measuring Valves feature:

- Positive-displacement piston design
- Adjustable piston stops
- Horizontal or vertical mounting capability
- One moving part

With these benefits:

- Accuracy and repeatability that cannot be matched by other measuring systems such as timed flow
- Capacity to "fine tune" and "lock in" output volume
- Reliability
- Long component life

Model 81741

Model 81740

Model	Description	Max. Mat'l. Supply Press.		Output Per Cycle			Dimensions in. / mm		Mat'l. Inlet / Outlet

Minimum supply pressure 500 psi (35 bar).

1/4" - 2" Air-Operated Pumps

Basic Design Features

Diaphragm pumps are driven by compressed air. The directional air distribution valve and pilot valve—the “air end”—are located in the center section of the pump. Liquid moves through two manifolds and outer chambers of the pump—the “wet end”. Generally, check valves are located at the top and bottom of each outer chamber or on a common manifold. The two outer chambers are connected by suction and discharge manifolds.

Lincoln’s double diaphragm self-priming design offers many advantages over other pumps.

- **Pump abrasive and sheer-sensitive materials.** Low interval velocities move abrasives easily with no damage. Gentle pumping action does not shear fragile materials.
- **Pumps viscous materials.** Even heavy or solids-laden materials can be pumped.
- **Environmentally friendly.** No motors, seals or packing to leak.
- **Self-priming.** Able to dry prime under most suction lift or flooded suction conditions.
- **Variable flow.** Regulate the inlet air supply to adjust flow.
- **Runs dry without damage.**
- **Deadheads against closed discharge.** Excessive back pressure stops operation without damage until discharge opens. Eliminates bypass systems or relief valves.
- **Explosion-proof.** Eliminates sparking concerns of other electrical or rotating pumps.

85630

85628

85622

85634

WARNING

In the event of diaphragm rupture, pumped material may enter the air end of the pump and be discharged into the atmosphere. **If pumping a product which is hazardous or toxic, the air exhaust must be piped to an appropriate area for safe disposition.**

1:1 Air-Operated Diaphragm Pump Line

Model Number	Pump Description	Pump Body	Wetted or Soft Parts	Pump Inlet/Outlet NPT	Max. Free Delivery GPM	Air Inlet NPT(F)	Max. Rec. Inlet Air Pressure	Max. Susp. Solids	Application

Wall Mount Brackets

Model 85255 Wall Mount Bracket

Wall mount bracket for 1/4" to 1/2" air-operated diaphragm pumps.

Model 84817 Wall Mount Bracket

Wall mount bracket for 1/2" to 2" air-operated diaphragm pumps.

Other Accessories

Model 240994 Drum Adapter Kit

For use with 1/2" polypropylene AOD pumps. Includes 2" NPT(f) bung bushing, 1" x 36" suction tube and adapter.

Model 275631 1" ANSI Flange To 1" NPT Adapter

Adapts 1" ANSI flange of 85639 polypropylene dual inlet pump to 1" NPT(f).PVC for low pressure installations. Three required to convert all pump inlets/outlets.

Model 275632 ANSI Bolt Kit with Seal

Attaches adapter to 85639 pump. One bolt kit required for each adapter. Three required to convert all pump inlets/outlets.

Transfer Pump Accessories

Suction Kits

Model 84945 Suction Kit

For transfer of product from drums, bulk tanks or reservoirs. Includes bung bushing suction tube, hose and coupling assembly. NOTE: 2" x 1" bell reducer required for use with Model 1914, not included.

Model 85256 Suction Kit

Same as 84945 except for use with 1/4" AOD pumps.

Used-Fluid Overfill Warning Valves

Float rises with used fluid to activate "whistle" warning at prescribed level.

Model 84815 Single Wall

For single wall tanks & drums in used fluid systems and above ground tanks.

Model 84824 Double Wall

Same as 84815 except for double walled tanks and above ground tanks.

4-Way Valve

Model 84816

Four port, two position valve used in waste fluid systems. Enables one pump to pump into and out of drum or tank. 1 in. NTP female threads inlet/outlet.

Thermal Pressure Protection

Protect lube system components from high-pressure spikes caused by temperature change in a closed fluid network.

Model	Description	Application	Pre-Set Relief Pressure	Port Size
282902	Valve only	AODD pumps	150 psi (10 bar)	1/2" NPT
277601-4	Kit with valve, hose, adapters	1/2 in. AODD pumps	150 psi (10 bar)	Integrated
277601-5	Kit with valve, hose, adapters	1 in. AODD pumps	150 psi (10 bar)	Integrated

Transfer Systems

Pump material from one container or reservoir to another. Typical applications involve high-volume transfer of low- to medium-viscosity fluids.

Model	Container Size	Ratio	Max. Dischrg. Pressure psi / bar	Maximum Delivery GPM/LPM	Pump Tube Construction	Packings	Pump Outlet
84080-9	55 gal.	3:1	375 / 26	2.5 / 9.5	316 Stainless Steel	PTFE	½" NPTF
84145-9	Bulk						
82230 *	16 gal. or 55 gal.	1:1	150 / 10	22 / 82	Carbon Steel	Leather	¾"-11-½" A.N.
84829	16 gal., 55 gal. or Bulk			16.5 / 66	Tube-Carbon Outlet Body Valox	Buna-N	¾" NPTF

* Accessories for 82230: 82715-PTFE kit; 91172-Hose & nozzle (see Notes: 2 below)

Model	Special Features
84080-9	2" bung bushing and ¼" NPTF return inlet.
84145-9	Wall mount kit and suction hose check (see Notes: 1 below)
82230	Built-in air control valve for throttling air supply to pump to control material output. Operates on pressure as low as 20 psi (1.4 bar). Self-adjusting bung bushing (see Notes: 2 below)
84829	Light weight and efficient. The pump will stall against pressure and can be controlled by a fluid dispensing valve.

Notes: 1) Suction hose or tube (not included) should be compatible with pumped product and not exceed 10' (3 m) long nor less than ¾" (19 mm) I.D.

2) 91172 transfer pump j. 8 feet (2.5 m) ¾" (19 mm) I.D. standard hose and curved spout, with inlet threaded ¾" - 11 - ½" A.N. to fit outlet of 82230 pump.

3) For transfer systems involving long supply lines, PowerMaster III stub pumps are available. Consult Lincoln for your application needs.

Value Series Pump Models

			120 psig 8.3 bar	20 psig 1.4 bar					

Features and Benefits—Designed for Value

- Proven horizontal, valved-piston motor design for simplicity and reliability
- Motor's single-stroke action delivers quick dispense, fill or transfer with high-volume output
- Built-in muffler for quiet operation
- Available as stub pump, 16-/55-gallon pump or 250- to 275-gallon tank pump

Model 4475 Series Pump

The model 4475 pump is a reciprocating-piston, low-pressure, single-action pump. Air powers the pump's piston on the dispensing, or working, stroke. An internal spring returns the piston and resets it for the working stroke. It pumps continuously when the dispensing (fluid outlet) valve is open and 20-120 psig air is supplied to the pump.

Specifications

Model No.	Description	Material Outlet	Operation	Pump Tube Length	Attachment

Ultra High-Pressure Pumps for Pressure Control Applications

Designed specifically for oil well services such as wireline and plug valve applications. In wireline applications, these pumps are used to seal against the well-head pressure as the well is being logged or perforated. In plug valve applications, they are used to pump heavy grease into the valve or "Christmas tree valves" to seal any gas leaks.

A complete line of lubrication solutions and industrial pumping products

Automatic lubrication

Our automatic systems dispense measured amounts of lubricant at predetermined intervals. Systems include Helios and Duo-Matic™ two-line systems, and Centro-Matic, Modular Lube, Quicklub and ORSCO precision oil lubrication. With our BearingSaver program, we find the best automated solution for you from our wide range of systems for grease, fluid grease and oil.

General lubrication

Sometimes a simple approach is the best solution. Our wide range of products includes smaller, self-contained automated lubricators and general lubrication equipment.

Industrial pumping

Lincoln has developed specialized pumps and pumping stations to handle the difficult job of transferring thick fluids. From the industry-best PileDriver III and PowerMaster III pumps and air motors to specialty pumps, controls and mounting accessories, Lincoln is the preferred pumping system for many tough applications on our worldwide resources.
